

Human-in-the-loop workload frontier (uncertainty-based routing with DST $m(\Omega)$)

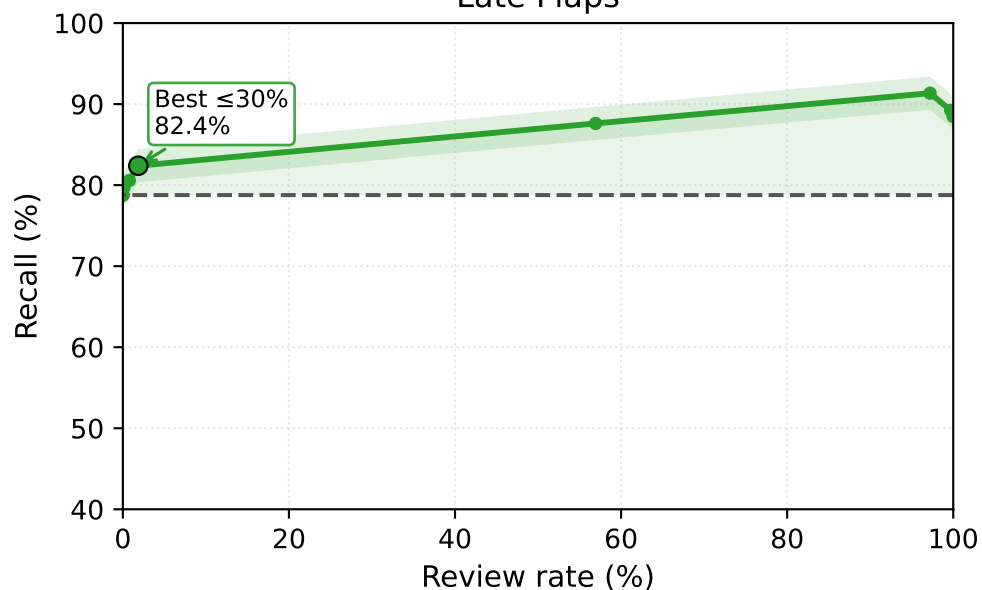

High Speed

High Path

Late Flaps

Classes

- High Speed
- High Path
- Late Flaps

Assumption: human accuracy = 90%
Best-under-cap points shown (cap = 30%)
Shaded region: gain over baseline recall

Summary at cap:

High Speed: baseline 43.1% $\rightarrow$ 48.1% at 2% review
High Path: baseline 72.2% $\rightarrow$ 75.0% at 2% review
Late Flaps: baseline 78.8% $\rightarrow$ 82.4% at 2% review
